

# TOMORROW'S CLASSIC...

The Cragar S/S wheel may be the most recognizable feature from the great-American drag racing heritage era.

With the Big Blue brake option, you'll be sure to slow down those 330 horses with authority.

Exclusive Cragar body panels give the authentic pro-stock street appearance not available on any other truck on the market.

Remember when you knew what was under the hood just by the sound of the exhaust? Welcome back to the smooth rumble.

# TODAY!

Delivering 330 HP, the cold air induction, combined with custom tuning calibration, won't leave you disappointed when you push the throttle.

Custom Cragar interior appointments let you enjoy the ride with all of today's conveniences.

Your Cragar Special Edition F-150 is serialized for posterity...and for *prosperity!* – think of it as your investment for the future.

Don't miss the opportunity to own a 2007 first production run of this future collectible Cragar Special Edition F-150.

With Authentic and nostalgic muscle car appeal, this all-American truck is offered with features sure to leave a legacy for generations.

LIMITED EDITION TRUCK. LIMITED TIME OFFER.

Cragar S/S wheels create the focal point for this nostalgic street truck. The F-150 suspension has been modified to craft a low-profile overall appearance and then equipped with 22" wheels and 305/40R22 tires to produce a ground-hugging façade. There is no doubt this truck creates the illusion of 'the good old days' when cars were fast and fun – life was different. These times are here again when you sit in this vehicle. Don't let this classic slip through your hands.

Cold air induction has been added to dramatically enhance performance. This system allows us to replace the restrictive, power robbing factory air filter assembly, picking up cool dense outside air and pumping it directly into the engine. And, with the addition of the hand-held programmer, you add horse power without disturbing the power train overstress protection (torque management) strategy. These components do not compromise the warranty of any OEM design and, in fact, carry their own five-year/60,000 mile warranty.

The massive six-piston forged billet calipers combined with 16" staggered vane, drilled and slotted zinc plated brake rotors provide the ultimate in big brake stopping power and look great behind the 22" Cragar wheels. Six stainless steel pistons generate high clamping force and balanced pad loading while resisting corrosion and reducing heat transfer from the pads. The advanced formula Cragar S/S heavy duty brake pads provide big stopping power and resist fade under extreme braking. The low dust, low noise formula is easy on the driver and wheels.

The custom-crafted interior has added thoughtful and tasteful elements which highlight the interior of your F-150. Totally recovered two-tone leather seats with headrests flaunting the famous Cragar logo, along with custom floor mats and steering wheel, provide the critical thumbprints necessary in maintaining vehicle identity for future generations.

Custom, proprietary Cragar body panels include the pro stock hood scoop, front and rear bumper covers, front fender air intake louvers, lower rocker moldings with integrated rear brake air inlets, classic wheel flares and custom tailgate panel. Every component has been thoughtfully designed to compliment the overall design and intent of this collector truck.

The limited edition availability is obvious with the serialized dash plate. You will also possess a certificate of authenticity for documentation of your investment. This is one of those opportunities that gives you the ability to not only enjoy your present, but to relive your past and leave something for the future. Don't allow yourself to look back and say "I wish I would have ..."

Cragar has perfected the rumble of the exhaust that draws the attention of any vehicle enthusiast. The purr of the engine is reminiscent of the days when you could hear the power from under your hood and feel the excitement in the pedal. It is deep, throaty and aggressive on the outside but provides low cabin resonance and a drone free ride on the inside. And, with today's technology, you'll not only see increased horsepower and torque, you're sure to see an increase in your MPG.

The subtle finishing touch to this exquisite, heart-pounding truck is the soft tonneau cover. Adding to the low profile appearance it is easily retracted to allow for larger cargo, yet allows you to protect smaller items from the elements – the real "truck trunk" of years gone by. An optional hard painted tonneau cover is available for those looking for added security.

Available in: Black, Bright Red, Dark Shadow Gray, White and Red Fire ... (who says an investment has to be green?)
